

FORMING SYSTEM MBF 1

The flexible module for formed variety!

INNOVATION

- ∨
1. Burgers
 2. Soup dumplings
 3. Vegetable burgers
 4. Vegetable sticks
 5. Cevapcici

Automatic forming of a variety of products, such as burgers, balls, slices and sticks, with the modular MBF forming system. Round, square or longish – a multitude of shapes in variable product sizes is possible.

Benefit from these advantages

- **Large variety of shapes for a wide variety of products:** round, square, longish and many more
- Patented, easy-change cutting set for **well-formed products**
- **Excellent product quality** thanks to the gentle Handtmann vane cell feed system
- **Cost control** with every portion thanks to high portioning accuracy and **cost savings** thanks to optimum reduction of give-away
- **Powerful portioning capacity** of up to 180 portions per minute
- Product weights up to 500 grams and product diameter up to 80 mm offer flexibility for a **wide range of products**

Placing formed products directly into trays

The turnkey solution for product variety and efficiency.

The Handtmann vacuum filler portions precise to the gram, the MBF1 forming system produces accurately formed products, the synchronised VRB1 retraction belt transports the products gently and precisely into the trays provided by the INTRAY depositor. Individually, in quantities of your choice.
